Additional intelligent solutions around the EVoline® assortment for structured cable management.

An attractive example for this is the EVoline® Cable Guide.

This module for the EVoline® Port offers an intelligent cable guiding solution. Any cable with any length can be installed as needed.

The mechanism allows easy retraction or extraction of cables which offers a user an extendable and adaptable approach to connect Laptops, Tablet PC's or other devices in conference rooms.

The three flexible guides accept almost any cable. The cables can be released and swapped without the aid of any tools, allowing a great deal of user flexibility.
